FLATWORK IRONERS

This range of Flatwork Ironers is specially designed for the restaurant and low production, and is ideal for ironing flatwork-tablecloths, sheets, napkins, pillowcases, etc.

- Front insertion and reception of linen
- External cabinet in Skin-plate.
- Uniform chest pressure throughout years of operation.
- Safety-Sensor.
- Electronic microprocessor for temperature control.
- Emergency stop button.
- Roller covered in polyester with cotton sheath or NOMEX

RELIABLE AND DURABLE

Only ELECTRIC HEATING version.

The linen should be passed through the dryer before hand to reach the moisture level of 20-25% for the optimum quality ironing.

Their simple mechanism makes them reliable and durable, meaning that this is the most economical and safe option for a small laundry.

FOR SMALLER SPACES

Wall mounted and small in size, they can be positioned in very limited spaces and require hardly any installation since they do not have any kind of exhaust or connection, except to the electricity supply.
