全自动步进电脑超高速包缝机
Automatic Stepping Motor Computerized Super
High Speed Overlock Machine

N550-SS 双步进全自动款/Double stepper motor full automatic

N550-ES 步进全自动款/Stepper motor full automatic

高转速
High speed

7000rpm

全自动
Fully automatic

半自动
Semi-automatic

自由缝
Free automatic

全人工
Fully manual

采用内置式直驱伺服电机，具有自动启动，自动缝制，自动停机，自动切线，自动吸线头、碎布，自动抬压脚等多项功能。自动吸风、自动剪线模式可根据用户需求任意调节。配备智能化的人机对话操作面板，可选配多种类型屏幕（触摸按键屏，触摸彩屏），可根据不同的功能要求及用户使用习惯进行人性化调节，操作方便、快捷。设有压脚与缝台开关顺序逻辑保护程序，有效防止穿线使机器误动作。基础款标配手动厚薄调节。采用针杆全包结构，有效降低针杆甩油风险。

Adopting a built-in direct drive servo motor, it has multiple functions such as automatic start, automatic sewing, automatic stop, automatic cutting, automatic thread suction head, broken fabric, automatic lifting and pressing foot, etc. The automatic suction and cutting modes can be adjusted according to user needs. Equipped with an intelligent human-machine dialogue operation panel, multiple types of screens (touch button screen, touch color screen) can be selected, which can be adjusted according to different functional requirements and user habits, making operation convenient and fast. There is a logic protection program for the sequence of presser foot and sewing table switches, effectively preventing machine misoperation caused by threading. Basic model comes standard with manual thickness adjustment. Adopting a fully wrapped needle rod structure effectively reduces the risk of needle rod oil spillage.

步进电机控制抬压脚及剪线功能，剪线控制更精确，噪声更低。

The stepper motor controls the presser foot lifting and wire cutting functions, resulting in more precise wire cutting control and lower noise.

根据布料可快速调整光眼识别(小网眼、大网眼、薄料、中厚料、厚料)

Quick adjustment of light eye recognition based on fabric (small mesh, large mesh, thin material, medium thick material, thick material)

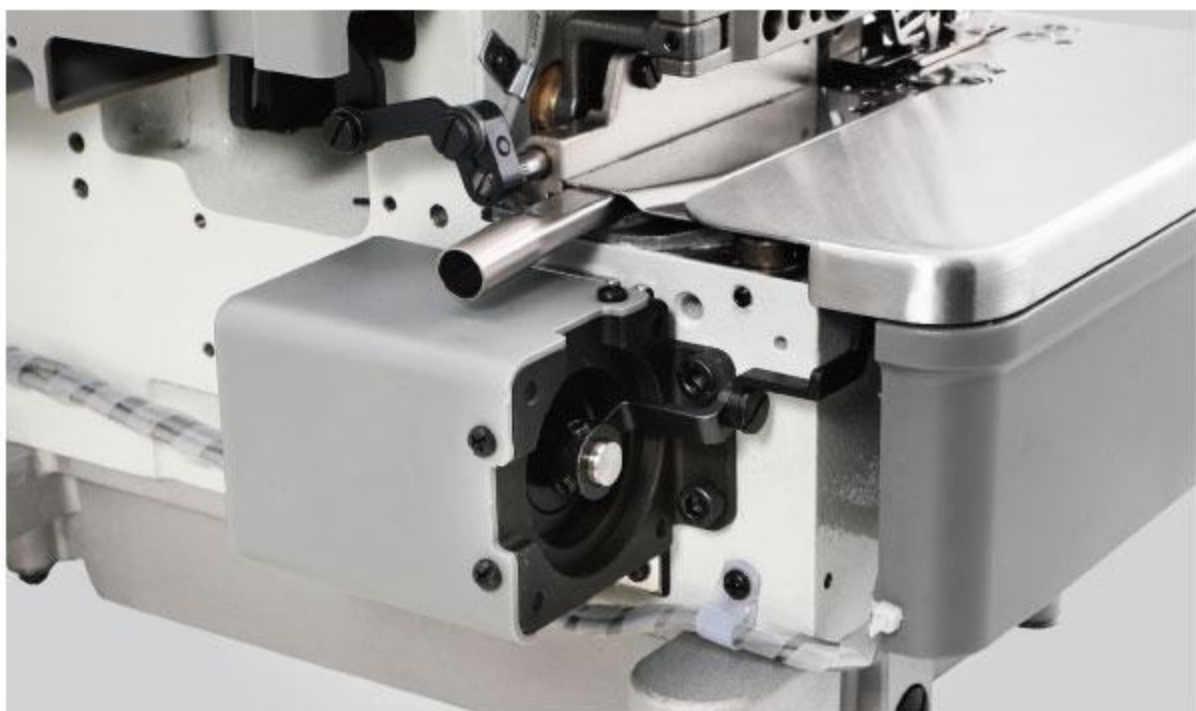

LED照明灯亮度三档可调，保证穿线精准的同时又不会对眼睛造成刺激。

The LED lamp brightness is adjustable to ensure accurate threading without irritating the eyes.

新款悬浮式显示屏
New floating display screen

步进双驱，三档可调（选配）
Stepper dual-drive, three-speed adjustable (optional)

USB智能端口
USB smart port
